

Amendments to the Claims:

A presentation of all the pending claims with their current status indicated follows.

Claims 1-33. (Cancelled).

34. (Previously Presented) A razor, in particular for wet shaving, comprising:
a unitary body having a handle region, a head region and a neck region located
between the handle region and the head region, and
functional components at least partially arranged within the unitary body and
comprising an electrically operated vibration device for producing vibrations in the head
region and an electrical supply device, having an energy store, for the vibration device, the
head region having a holding device for an exchangeable blade element and the vibration
device being arranged in the unitary body in proximity of the holding device; wherein
the vibration device comprises a motor with a flywheel arranged eccentrically in
relation to an axis of rotation; and
the motor and flywheel are arranged within a protective sleeve, the protective sleeve
being substantially enclosed within the head region of the unitary body, the motor and
protective sleeve extending along the axis of rotation more than the protective sleeve extends
perpendicular to the axis of rotation;
wherein the energy store is at least partially located in the handle region; and
wherein the handle region is angled relative to the head region.

Claim 35. (Cancelled)

36. (Currently Amended) The razor as claimed in claim [35] 34, wherein the vibration
device is arranged in the body in such a way that the vibration of the vibration device during
use produces movement of the head region consequently vibrates substantially radially in
relation to the axis of rotation.

Claims 37-41. (Cancelled)

42. (Currently Amended) The razor as claimed in claim [35] 34, wherein the vibration device is arranged in a recess in the head region, in proximity to the holding device.

Claim 43. (Cancelled)
